## **INTRODUCTION:**

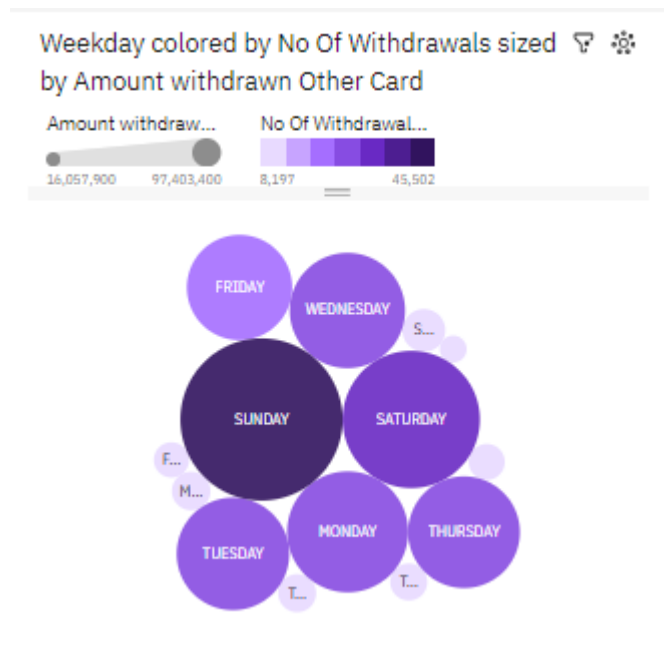

Our project focuses on leveraging IBM COGNOS Analytics for analyzing financial management with COGNOS versatile toolbox which include a dynamic dashboard and we develop it into data exploration and analysis. By uncovering trends and patterns, we aim to enhance operational efficiency and giving the relevant data where the atm is more used and want. We utilize COGNOS to extract actionable insights and drive informed decision-making in Financial management.

## **ABSTRACT :**

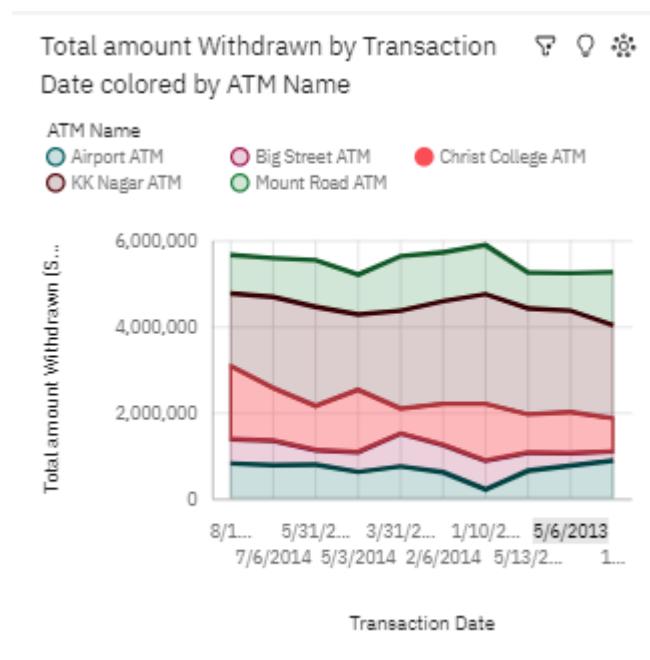

This project explores the utilization of IBM COGNOS Analytics for analyzing Financial management data of ATM, aiming to enhance operational efficiency and by giving the relevant data for the working of ATMS. Leveraging COGNOS' versatile toolbox, a bar graph, pie chart and line graph with a dynamic dashboard Through uncovering trends and patterns, actionable insights are extracted to drive informed decision-making.

# REPORTS:

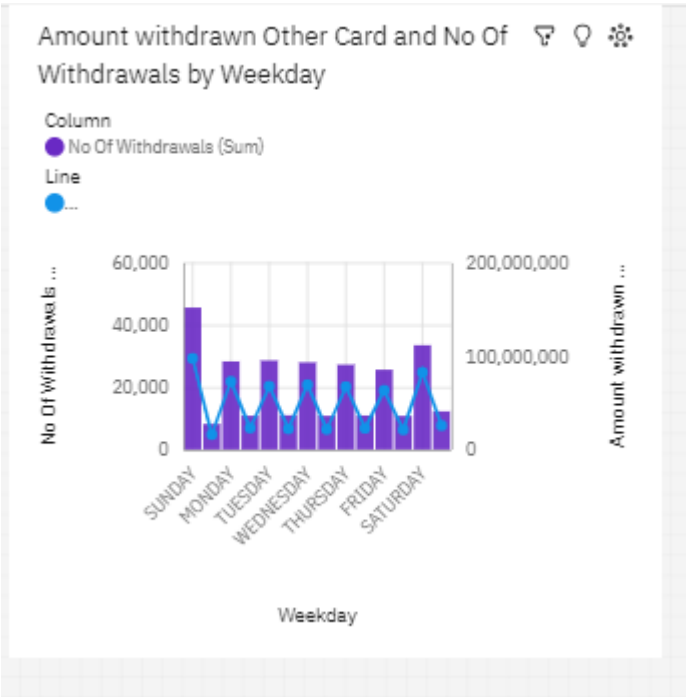

## 1.WEEKDAY COMPARED BY NO. OF WITHDRAWALS

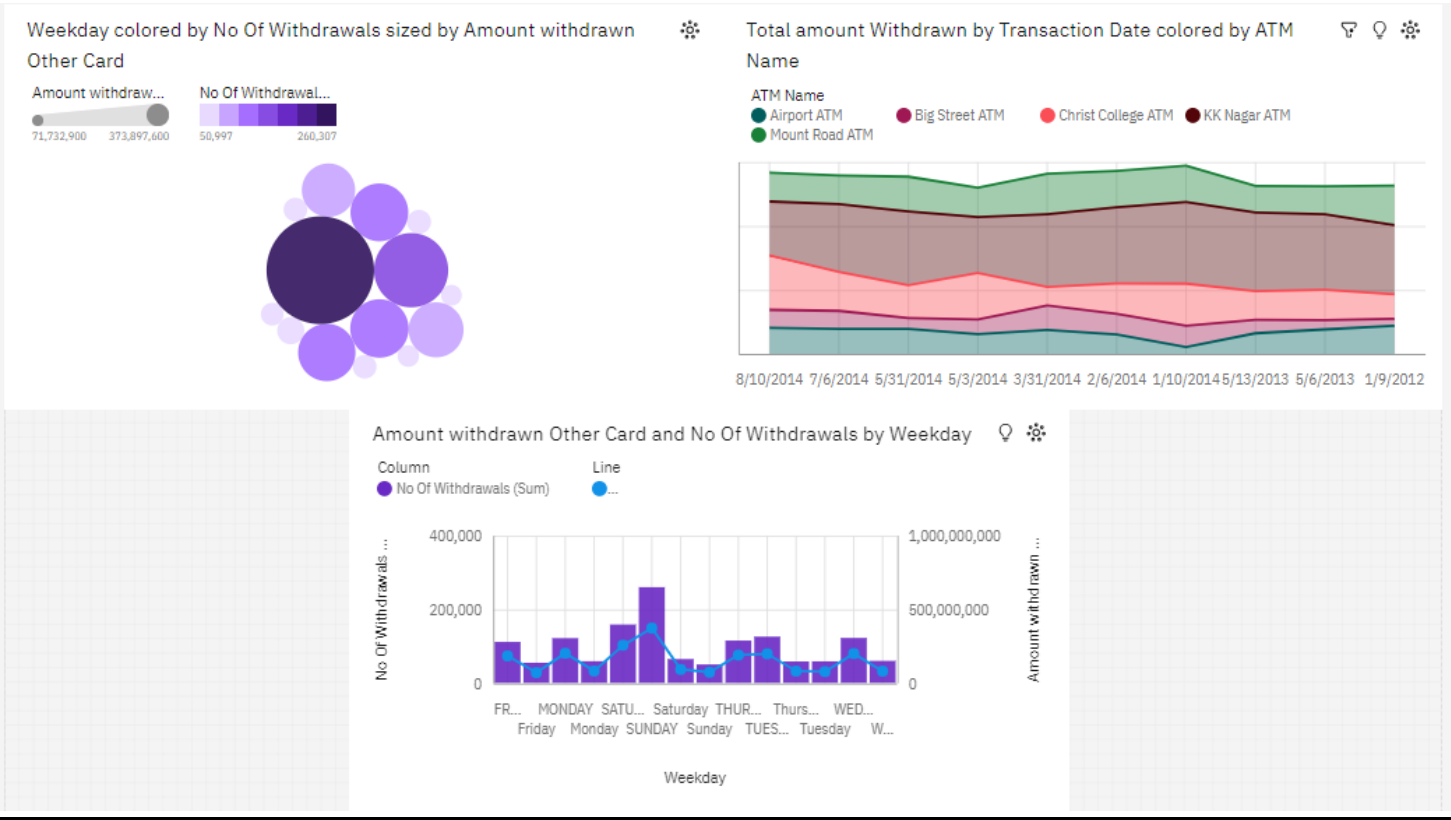

## 2. TOTAL AMOUNT WITHDRAWN BY TRANSACTION DATE

### 3. AMOUNT WITHDRAWN BY OTHER CARD BY WEEKDAY

### FINAL DASHBOARD

## **CONCLUTION:**

Our project has used IBM COGNOS Analytics to study financial data of ATMs better. We've explored different parts of the data using tools like charts and dynamic dashboard. By doing this, we've found trends and patterns that help ATMs in financial sector as run more smoothly and make customers happier. This shows how important it is to use data to make smart decisions in the banking industry.
